

Ortho Supply List

(Available through Henry Scheine, Patterson)

Core List

Items we recommend as foundational are indicated by an | orange line

Consults and Records:

Deluxe Cheek Retractor System Retracts lips and cheeks for clear access during bonding or photography

Adult Cheek Retractors | 2 pk Disposable retractors for adult patients during bonding or photography

Teen Cheek Retractors | 2 pk Smaller-sized retractors suited for adolescent patients

Riofoto Mirror Occlusal Palatal / Adult & Child Intraoral mirrors for photographing occlusal and palatal surfaces for consults or records

For Bonding Attachments:

| **Liquid Etch 23g** Roughens enamel to create a bondable surface for attachments

| **Assure Plus** Adhesion primer that improves composite retention on enamel

| **Transbond Supreme LV Flowable | 2 pk** Composite used to build and bond attachments

Dappen Dish Glass Clear Small mixing dish for dispensing liquid etch, primer, or adhesive

40% Phosphoric Acid Etching Gel Syringe Kit Applied to enamel before bonding to improve adhesion

Reliance Liquid Etch Phosphoric acid etchant that prepares enamel for bonding

Assure Plus All Surface Bonding Resin 6cc Universal primer/bonding agent that promotes composite retention on enamel

GoTo Paste in Tips | 10 pk Pre-loaded paste composite tips for quick, consistent attachment bonding

HSI Bendable Microtip Applicators (Fine/Regular/Super Fine) Flexible-tip brushes for precise placement of bonding agents and primers

Multi-Use Tip Dispensing Composite Gun Dispenses flowable composite from cartridges directly into attachment templates

For IPR:

| Mosquito Diamond Tip IPR Burs Removes small amounts of enamel between teeth to create space for movement

| IPR Strips 8mm Manual alternative to burs for fine interproximal reduction

Burs, Discs + Mixed Kits

The Magic IPR Slenderization System All-in-one IPR system combining strips, burs, and gauges for a complete workflow

Magic IPR Slenderizing Bur Block Kit Handpiece-driven bur system for precise, efficient interproximal reduction

Magic IPR System Bur Block Kit Similar bur-based IPR system, typically used with a block guide for controlled depth

Orthodontic IPR Stripping Disc System Rotary disc-based IPR method for faster removal in wider contacts

Strips

Magic Strip Starter Kit Entry-level manual IPR strip system for interproximal enamel reduction

Qwikstrip Strips Assorted | 10 pk Abrasive interproximal strips for manual IPR across varying contact widths

IPR Ortho Interproximal Stripping Kit Comprehensive strip-based IPR system for full-arch reduction

FXDS3 Diamond Strips Serrated Fine | 10 pk Fine-grit serrated diamond strips for controlled IPR

CXDS3 Diamond Strips Serrated Super Fine | 10 Pk Super fine version for finishing and polishing after IPR

Narrow Extra Fine / Fine / Medium Interproximal Strips Graduated-grit narrow strips for IPR in tight anterior contacts

Wide Extra Fine / Fine / Medium Interproximal Strips Same as above, sized for broader posterior contacts

Gauges

IPR Reduction Gauge Set Precision measurement tool to confirm correct IPR depth per the treatment plan

Galaxy IPR 6pc Gauge Set | .10mm—.50mm Calibrated gauges to measure the amount of enamel reduction achieved during IPR

For Using Elastics:

Buttons

Bondable Buttons | 10 pk Bonded anchor points for attaching elastics to teeth

Bondable Buttons w/ Hooks | 10 pk Same as above, with an integrated hook for easier elastic placement

Composite Direct Bond Button | 10 pk Bonded anchor points on teeth for attaching elastics

Button Bonding Material

40% Phosphoric Acid Etching Gel Syringe Kit Applied to enamel before bonding to improve adhesion

Reliance Liquid Etch Phosphoric acid etchant that prepares enamel for bonding

HSI Bendable Microtip Applicators (Fine/Regular/Super Fine) Flexible-tip brushes for precise placement of bonding agents and primers

Bonding Accessories

Light Bond Paste in 5gm Push Syringe Light-cure bonding resin used to adhere attachments or buttons to enamel

Dappen Dish Glass Clear Small mixing dish for dispensing liquid etch, primer, or adhesive

Elastics (recommended):

| 3/16, 2 ½ oz Light Elastics | 50 pk Smaller-diameter elastics for localized or tighter bite correction

| 1/4, 2 ½ oz Light Elastics | 50 pk Larger-diameter elastics for Class II/III correction with sustained light force

For Removing Attachments:

| Adhesive Removing Carbide Burs Strips residual composite off enamel after treatment

| Polishing Burs Smooths and re-polishes enamel after composite removal

Aligner Items:

| Pull tools Helps patients remove tight-fitting aligners without breaking them

| Chewies Bite cylinders that help patients fully seat their aligners for accurate tracking

| Cases Included in aligner delivery, extras on-hand are helpful for replacements

Scissor Iris 4.5" Straight Fine-tipped scissors for trimming aligner edges
